

MULTI-CONSTITUENT, LIQUID, LEAF APPLICABLE FERTILIZER CONTAINING A COMPLETE SET OF MICRO-CONSTITUENTS CHELATED BY BIODEGRADABLE IDHA AND NITROGEN, PHOSPHOROUS AND POTASSIUM

The fertilizer is manufactured under a licence granted by BASF. It is a universal fertilizer with a balanced composition, and can be applied for all agricultural and garden crops. When used preventively, it limits the risk of occurrence of deficiencies of micro- and macro-constituents.

nutritional substances	content in volumetric %	content in gravimetric %	content in g/l
N - nitrogen	14.4	12.0	144.0
P ₂ O ₅ - phosphorous	4.8	4.0	48.0
K ₂ O - potassium	7.2	6.0	72.0
MgO - magnesium	0.24	0.2	2.4
Mn – manganese*	0.012	0.01	0.12
Cu – copper*	0.012	0.01	0.12
Fe – iron*	0.012	0.01	0.12
B - boron	0.024	0.02	0.24
Zn – zinc*	0.006	0.005	0.06
Mo - molybdenum	0.006	0.005	0.06

d=1.20

*Manganese, copper, zinc, iron chelated by the biodegradable chelating agent **IDHA**.

crop	concentration of usable liquid in %	fertiliser quantity l/ha	water l/ha
cereals	2.0-6.0	6-12	200-300
beet	1.5-6.0	6-10	180-300
potatoes	2.0-6.0	6-12	200- 300
rape	2.0-6.0	6-12	200-300
maize	2.0-6.0	6-10	180-300
fruit trees	0.5-1.0	7.5-15	1500
grapes (outside of the blooming period)	0.3-0.6	4.5	1500
hop	0.5-1.0	7.5-15.0	1500
field vegetables	0.4-2.0	2.5-6.0	600
brassicas	2.0-3.0	12.0-18.0	600

Available packaging: 10 litres, 20 litres and 1,000 litres.
