

Dilos-K

COMPOSITION

Potassium (K ₂ O).....	30.0%
Aminoacids.....	10.0%

INFORMATION

DILOS K is a liquid fertilizer rich in potassium, in complex form with amino-acids.

- Pulls the harvest earlier
- Increases yield and improves quality of high value crops
- Increases plant resistance to diseases
- Increases fruit resistant to handling (transportation etc.) and increases storage life
- Improves nutritional value, taste and color of fruits and vegetables

Moreover, **DILOS K** improves the qualitative characteristics, such as colouration in tobacco, taste and aroma in fruits, sugar level, vitamins (B1, C) and carotene concentration. **DILOS K** decreases the undesirable oxalic acid, elongates the post harvest preservation period, strengthens fruits durability, etc.

GENERAL RATES

Foliar : 200-400 cc/100 lt of water
Fertigation : 1-2 lt/1000 m²
